

**The Appendix is an integral part of  
Certificate of Accreditation No. 222/2023 of 05/05/2023**

**Accredited entity according to ČSN EN ISO/IEC 17020:2012:**

**Mostecká montážní a.s.**  
Inspection Body of Mostecká montážní a.s.  
Osecká 64, 417 22 Háj u Duchcova

Ordinal number <sup>1)</sup>	Inspection field	Inspection type and scope	Inspection procedure
1*	Inspection of pressure equipment	Assessment of whether the requirements for pressure equipment safety, inspection, management and evaluation of tests are met in the operation, control, repair, maintenance, inspection and testing of pressure equipment to certify that pressure equipment and its safety and pressure systems meet the requirements of the regulations for safety and functionality of technical equipment.	IP_01 TZ, version 4 edition 5
2	Reserved		
3*	Inspection of steel structures	Assessment of whether the requirements for steel structure safety, inspection, management and evaluation of tests are met in the operation, repair, maintenance and inspection of steel structures to certify that steel structures and materials used for their production meet the requirements of the regulations for safety and functionality of technical equipment.	IP_03 OK, version 4 edition 2
4*	Inspection of gas equipment	Assessment of whether the safety requirements for gas equipment are met in the assembly, operation, control, repair, maintenance and inspection of gas equipment. Inspection, management and evaluation of tests of gas equipment	IP_04 PZ, version 5 edition 5
5*	Inspection of pipelines	Assessment of whether the requirements for pipeline safety, inspection, evaluation of tests and inspections are met in the manufacture, assembly, operation, control, repair, maintenance,	IP_05 pipeline, version 2 edition 2

**The Appendix is an integral part of  
Certificate of Accreditation No. 222/2023 of 05/05/2023**

**Accredited entity according to ČSN EN ISO/IEC 17020:2012:**

**Mostecká montážní a.s.**  
Inspection Body of Mostecká montážní a.s.  
Osecká 64, 417 22 Háj u Duchcova

Ordinal number <sup>1)</sup>	Inspection field	Inspection type and scope	Inspection procedure
		inspection and checking of pipeline equipment to certify that the equipment meets the requirements of the regulations for safety and functionality of the equipment	
6*	Inspection of scaffolding	Assessment of whether the requirements for safety, inspection, evaluation of inspections are met in the erection, production, operation, maintenance and inspection of scaffolding to certify that the scaffolding meets the safety requirements	IP_07 scaffolding, version 2 edition 3
7*	Inspection of electrical equipment	Assessment of whether safety requirements are met in the operation, control, repair, maintenance, inspection and testing of electrical equipment. Performance of checks, inspections, documentation reviews and test evaluations to certify that electrical equipment meets the requirements of regulations for safety, functionality and economy of specified electrical technical equipment in buildings with or without explosive atmospheres, on high voltage with limitation up to 230kV and lightning conductors in buildings with or without explosive atmospheres	IP_08_EZ, version 3 edition 5
8*	Inspection of machinery	Assessment of whether safety requirements are met in the operation, control, repair, maintenance, assessment and inspection of machinery. Also the conformity assessment of machinery including production documentation, risk analysis, and	IP_09_machinery, version 2 edition 3

**The Appendix is an integral part of  
Certificate of Accreditation No. 222/2023 of 05/05/2023**

**Mostecká montážní a.s.**  
Inspection Body of Mostecká montážní a.s.  
Osecká 64, 417 22 Háj u Duchcova

Ordinal number <sup>1)</sup>	Inspection field	Inspection type and scope	Inspection procedure
		compliance with regulatory requirements for safety and functionality of machinery	
9*	Inspection of vessels, excluding recreational vessels	Assessment of the technical state of operated vessels. Assessment of newly built vessels. Assessment of repairs, reconstruction and documentation of new and operated vessels. Inspection of UTZ – heavy-current equipment. Inspection of UTZ – gas equipment. Inspection of UTZ – pressure equipment. Inspection of UTZ – steam boilers.	IP_10_vessels, version 4, edition 5
10*	Inspection of steel structures under water	Assessing whether a steel structure operated under the water surface is suitable for further operation, is technically suitable for operation with restrictions, is not suitable or is not suitable to continue fulfilling its purpose	IP_11_Inspection of steel structures under water, version 1, edition 1

<sup>1)</sup> Asterisk at the ordinal number identifies that within the scope of accreditation, the Inspection Body is allowed to include new/updated/revised normative documents for the conformity assessment from time to time. Updated list of normative documents provided within the flexible scope of accreditation is available at the Inspection Body from the Inspection Body Manager.

Explanations:

IP\_XX            Inspection Body Internal Procedure  
UTZ             Selected Technical Equipment  
EZ                Electrical Equipment
